

SYNERGISTIX LABS

Peptide Product Catalog

Available products with specifications and descriptions

Product Name	Available Sizes	Description
5-AMINO-1MQ	5mg, 10mg Capsule: 50mg	Metabolic modulator that inhibits NNMT enzyme, supporting fat metabolism and energy expenditure.
ACE 031	1mg	Activin receptor decoy that promotes muscle growth by blocking myostatin signaling.
ACTH 1-39	5mg	Full-length adrenocorticotrophic hormone involved in cortisol regulation and adrenal function.
Adamax	5mg, 10mg	Synthetic peptide researched for neuroprotective and cognitive-enhancing properties.
Adipotide / FTPP	2mg, 5mg, 10mg	Pro-apoptotic peptide that targets blood vessels supplying white adipose tissue.
AHK-Cu	50mg	Copper-binding tripeptide studied for hair follicle stimulation and wound healing.
AICAR	50mg, 100mg	AMP kinase activator that mimics exercise at the cellular level, enhancing endurance and glucose uptake.
AOD 9604	2mg, 5mg, 10mg	Modified fragment of growth hormone studied for fat metabolism without affecting blood sugar or growth.
ARA 290 (Cibinetide)	10mg, 16mg	Innate repair receptor agonist with anti-inflammatory and tissue-protective properties.
B7-33	2mg, 10mg	Single-chain relaxin-family peptide studied for anti-fibrotic and cardiovascular benefits.
Bacteriostatic Water	3ml, 10ml	Sterile water with 0.9% benzyl alcohol used for reconstituting lyophilized peptides.
BPC 10mg + TB 10mg	20mg combo	Higher-dose combination of BPC 157 and TB-500 for enhanced healing protocols.
BPC 157	2mg, 5mg, 10mg Capsule: 500mcg	Body Protection Compound derived from gastric juice; researched for tissue repair, gut healing, and tendon recovery.

Product Name	Available Sizes	Description
BPC 5mg + TB 5mg	10mg combo	Combination of BPC 157 and TB-500 for synergistic tissue repair and recovery support.
Cagrilintide	5mg, 10mg	Long-acting amylin analogue that regulates appetite and energy balance.
Cagrisema	5mg (2.5mg + 2.5mg)	Fixed combination of cagrilintide and semaglutide for dual-pathway weight management.
Cardiogen	20mg	Short bioregulator peptide studied for cardiac tissue support and heart cell regeneration.
CJC 1295 (no DAC) 5mg + Ipamorelin 5mg	10mg combo	Synergistic stack combining GHRH and GHRP pathways for amplified GH release.
CJC 1295 (without DAC)	2mg, 5mg, 10mg	Modified GHRH (Mod GRF 1-29) that stimulates pulsatile growth hormone secretion.
CJC 1295 with DAC	2mg, 5mg	Long-acting GHRH analogue with Drug Affinity Complex for sustained growth hormone release.
Cortagen	20mg	Bioregulator peptide studied for cerebral cortex support and cognitive function.
Crystagen	20mg	Thymus-derived bioregulator peptide studied for immune system modulation.
Dermorphin	2mg, 10mg	Potent opioid peptide originally isolated from frog skin; studied in pain research.
Dihexa	5mg, 10mg Capsule: 10mg	Angiotensin IV analogue studied for cognitive enhancement and neurotrophin signaling.
DSIP (Delta Sleep-Inducing Peptide)	2mg, 5mg	Neuropeptide studied for sleep regulation, stress modulation, and neuroendocrine balance.
Dulaglutide	5mg, 10mg	GLP-1 receptor agonist used to improve glycemic control and support weight management.
Epithalon	10mg, 50mg	Telomerase-activating tetrapeptide studied for anti-aging and pineal gland regulation.
EPO (Erythropoietin)	3000 IU	Glycoprotein hormone that stimulates red blood cell production and oxygen-carrying capacity.
FOX04	2mg, 10mg	Cell-penetrating peptide studied for selectively inducing apoptosis in senescent cells.
FOXO4-DRI	2mg, 10mg	D-retro-inverso form of FOXO4; studied for enhanced senolytic activity and stability.
Frag 17-23	10mg	Short fragment peptide studied for metabolic activity.
FST 344 (Follistatin)	1mg	Activin-binding protein that inhibits myostatin, studied for muscle growth and fertility support.
GDF-8 (Myostatin)	1mg	Growth differentiation factor 8; used in research targeting muscle wasting and atrophy pathways.

Product Name	Available Sizes	Description
GHK-Cu	50mg, 100mg	Copper peptide that promotes collagen synthesis, skin remodeling, wound healing, and hair growth.
GHRP-2	5mg, 10mg, 15mg	Growth hormone releasing peptide that stimulates GH secretion via the ghrelin receptor.
GHRP-6	5mg, 10mg	Growth hormone releasing hexapeptide; potent GH secretagogue that also increases appetite.
GLOW (BPC 10mg + GHK-Cu 50mg + TB 10mg)	70mg combo	Triple-peptide blend targeting tissue repair, collagen production, and skin rejuvenation.
Glutathione	600mg, 1500mg	Master antioxidant tripeptide that supports detoxification, immune defense, and cellular protection.
Gonadorelin Acetate	2mg, 5mg	GnRH agonist that stimulates LH and FSH release, supporting reproductive hormone regulation.
HCG (Human Chorionic Gonadotropin)	1000 IU, 2000 IU, 5000 IU, 10000 IU	Glycoprotein hormone that mimics LH, used to support testosterone production and fertility.
Hexarelin Acetate	2mg, 5mg	Potent GH secretagogue with additional cardioprotective properties studied in vitro.
HGH (Human Growth Hormone)	6 IU, 8 IU, 10 IU, 12 IU, 15 IU, 24 IU, 36 IU	Recombinant somatotropin that supports growth, body composition, metabolism, and recovery.
HGH Fragment 176-191	1mg, 2mg, 5mg, 10mg, 12mg, 15mg	C-terminal fragment of HGH studied specifically for fat metabolism without growth effects.
HMG	75 IU	Human menopausal gonadotropin containing FSH and LH for reproductive hormone support.
Humanin	10mg	Mitochondria-derived peptide with cytoprotective effects; studied for neuroprotection and metabolic regulation.
IGF-1 LR3	100mcg, 1mg	Long-acting insulin-like growth factor with extended half-life for muscle growth and recovery research.
Ipamorelin	2mg, 5mg, 10mg	Selective GH secretagogue with minimal effect on cortisol, prolactin, or appetite.
Kisspeptin-10	5mg, 10mg	Hypothalamic neuropeptide that regulates GnRH release, reproductive function, and puberty onset.
KLOW	80mg	Multi-peptide blend formulated for targeted wellness support.
KPV	5mg, 10mg	Anti-inflammatory tripeptide derived from alpha-MSH; studied for gut inflammation and skin health.
L-Carnitine	2mg, 400mg, 600mg, 1200mg	Amino acid derivative that transports fatty acids into mitochondria for energy production.
Lemon Bottle	10ml	Lipolytic solution blend used in aesthetic fat-dissolving treatments.
Lipo-C	10ml	Lipotropic injection blend supporting fat metabolism and liver detoxification.

Product Name	Available Sizes	Description
Liraglutide	5mg, 10mg, 30mg	GLP-1 receptor agonist for glycemic control and weight management.
LL-37	5mg	Human cathelicidin antimicrobial peptide with broad-spectrum immune defense and wound healing properties.
Matrixyl	10mg	Palmitoyl pentapeptide-4 that stimulates collagen and fibronectin production for skin rejuvenation.
Mazdutide	10mg	Dual GLP-1/glucagon receptor agonist studied for weight loss and metabolic improvement.
Melanotan I	10mg	Linear alpha-MSH analogue that stimulates melanogenesis for skin pigmentation.
Melanotan II	10mg	Cyclic alpha-MSH analogue studied for tanning, libido, and appetite suppression.
MGF (Mechano Growth Factor)	2mg	Splice variant of IGF-1 released in response to mechanical stress; promotes muscle repair.
MIC (Lipo-C with B12)	10mg	Methionine-Inositol-Choline blend with B12 for lipotropic fat metabolism support.
MK-677 (Ibutamoren)	5mg	Oral GH secretagogue and ghrelin mimetic that elevates GH and IGF-1 levels.
MOTS-c	10mg, 15mg, 20mg, 40mg	Mitochondrial-derived peptide that regulates metabolic homeostasis and exercise mimicry.
NAD+	100mg, 500mg, 1000mg	Essential coenzyme supporting cellular energy production, DNA repair, and sirtuins activation.
Orexin A	10mg	Neuropeptide that regulates wakefulness, arousal, appetite, and energy homeostasis.
Orexin B	5mg, 10mg	Hypothalamic neuropeptide involved in sleep-wake regulation and metabolic control.
Oxytocin Acetate	2mg, 5mg, 10mg	Neuropeptide involved in social bonding, stress regulation, and smooth muscle contraction.
P21 (P021)	5mg	Neurotrophic peptide studied for BDNF-pathway activation and cognitive support.
PE-22-28	5mg, 10mg	Peptide studied for anti-aging and mitochondrial function enhancement.
PEG-MGF	2mg	PEGylated Mechano Growth Factor with extended half-life for sustained muscle repair signaling.
Pinealon	5mg, 10mg	Tripeptide bioregulator that supports pineal gland function and neuroendocrine balance.
PNC-27	5mg	Anticancer peptide that targets HDM-2 on tumor cell membranes, inducing selective necrosis.
PT-141 (Bremelanotide)	10mg	Melanocortin receptor agonist studied for sexual dysfunction in both men and women.

Product Name	Available Sizes	Description
Retatrutide	5mg, 10mg, 15mg, 20mg, 30mg, 60mg	Triple-agonist peptide (GLP-1/GIP/glucagon) studied for significant weight reduction.
Selank	5mg, 10mg	Synthetic tuftsin analogue with anxiolytic, nootropic, and immunomodulatory effects.
Semaglutide	2mg, 5mg, 10mg, 15mg, 20mg, 30mg	GLP-1 receptor agonist widely studied for weight management and glycemic control.
Semax	5mg, 10mg	Synthetic ACTH fragment with nootropic, neuroprotective, and cognitive-enhancing properties.
Sermorelin Acetate	2mg, 5mg, 10mg	GHRH analogue that stimulates natural pulsatile growth hormone release from the pituitary.
SLU-PP-322	5mg Capsule: 250mcg	Exercise mimetic that activates ERR pathways, studied for endurance and metabolic benefits.
Snap-8	10mg	Octapeptide that modulates SNARE complex formation, studied for reducing expression wrinkles.
SS-31 (Elamipretide)	10mg, 50mg	Mitochondria-targeted peptide that stabilizes cardiolipin and reduces oxidative stress.
Survodutide	10mg	Dual glucagon/GLP-1 receptor agonist studied for obesity and fatty liver disease.
TB-500 (Thymosin Beta-4)	2mg, 5mg, 10mg	Naturally occurring peptide involved in tissue repair, cell migration, and anti-inflammatory signaling.
Tesamorelin	2mg, 5mg, 10mg, 20mg	GHRH analogue approved for reducing visceral adipose tissue; stimulates GH secretion.
Tesofensine	Capsule: 500mcg	Triple monoamine reuptake inhibitor studied for appetite suppression and weight loss.
Thymalin / Thymulin	10mg	Thymic peptide bioregulator that supports immune system modulation and T-cell maturation.
Thymosin Alpha-1	5mg, 10mg	Immune-modulating peptide that enhances T-cell function, dendritic cell activity, and vaccine response.
Tirzepatide	2mg, 5mg, 10mg, 15mg, 20mg, 30mg, 40mg, 50mg, 60mg, 80mg	Dual GIP/GLP-1 receptor agonist for glucose control and substantial weight reduction.
Triptorelin Acetate	2mg	GnRH agonist used in research for hormone regulation, fertility, and prostate-related studies.
VIP (Vasoactive Intestinal Peptide)	5mg, 10mg	Neuropeptide with vasodilatory, anti-inflammatory, and bronchodilatory properties.
